

## Comparison between **XGen Plus** and others

S.n o.	Feature	Xgen Plus	IndiaTime s	Rediffmail	Bizmail	IPlanet	qmail
1.	Virtual Storage	It is a very <i>smart</i> feature and is used to store bulky files, which could be difficult for the sender to transport by e-mail or for receiver to receive them in their limited storage in inbox and in this case the receiver will receive only the link of the file instead of the whole file and hence the inbox will not be overloaded.	No such Feature Present.	No such feature Present	No such feature Present		
2.	Fax facility	<b>Present.</b> <i>Fax via email without Fax machine.</i> The user can send fax by creating separate password and user name for his/her fax account, and schedule the delivery of fax as well.	No such feature Present	No such feature Present	No such feature Present		
3.	Login Information	<b>Present.</b> This is a unique feature in XGenPlus, which basically is used to give information on the following:  <ul style="list-style-type: none"> <li>• Last log in IP</li> <li>• Last log in Date</li> <li>• Current IP Address</li> <li>• Last Unsuccessful</li> </ul>	No Such feature	No Such feature	No Such feature		

		<p>Login IP and Last 10 Login</p> <ul style="list-style-type: none"> <li>IP Details</li> </ul> <p>This feature can keep track of intruders by way of recording IP addresses, so that the user knows about any possible invasion of his/her email account by anyone else and thus takes care of security.</p>					
4.	Private Label Branding	<p><b>Present.</b> This feature can be used to Customize XGen Plus interface according to a particular client's brand.</p>	<p><b>Not Present</b></p>	<p><b>Not Present</b></p>	<p><b>Present</b></p>		
5.	Speed	<p>Much better and Comparable to any other mail client, because of some smart approaches followed like not going to server for every request/page fetch thereby helping in reducing network traffic and optimizing available bandwidth and speed,also because of some innovative approaches taken speed here is not always dependent on available bandwidth limitation.</p>	<p><b>Speed</b> is there But not to that extent because of lot of requests going to server every time to fetch data/page/request.</p>	<p><b>Speed</b> is there But not to that extent because of lot of requests going to server every time to fetch data/page/request.</p>	<p><b>Speed</b> may be dependent on available bandwidth and other connection/speed oriented factors.</p>		

6.	Special Folders By Category	<b>Present</b> (All New Mails,Read Mails,Today's Mails,Yesterday's Mails, Replied,Forwarded,High Priority,Attachment,Scheduled,Reply Awaited)	All these <b>Special Folders</b> are <b>not present</b> and only the standard ones are there.	All these <b>Special Folders</b> are <b>not present</b> and only the standard ones are there.	All these <b>Special Folders</b> are <b>not present</b> and only the standard ones are there.		
7.	Full Customization	<b>Present.</b> The product is fully customizable according to client's needs and can be tailored according to client's specific requirements including branding etc as mentioned earlier.	<b>Partially Present.</b> It cannot be fully customized according to a user's requirements and only some options on a Premium basis are allowed such as	<b>Partially Present.</b> It cannot be fully customized according to a user's requirements and only some options on a Premium basis are allowed such as	<b>Customizable</b> to some extent By allowing private branding etc and through some other options via the Administrative control Panel.		

			increasing space/mail quota etc.	increasing space/mail quota etc.			
8.	Integration with other antivirus/antispam	<p><i>Present.</i> Xgen Plus is already integrated with one of the world's best(Ranked as 6<sup>th</sup> in the world by Red hat</p> <p>antispam product developed by Data Infosys Ltd which takes care of all <b>Spam and virus</b> issues relieving users completely of any worries regarding Spam and Virus attacks.</p>	<p><b><i>Virus scanners and Spam blockers available but Still lot of spam gets through and Full protection is still not yet available</i></b></p>	<p><b><i>Virus scanners and Spam blockers available but Still lot of spam gets through and Full/adequate protection is still not yet available</i></b></p>	<p><b><i>Anti Spam And Anti Virus filters available</i></b></p>	Anti-Virus Capabilities	
9.	ID can be changed <b>Dynamically</b> at the time of compose	<p>This again is a unique feature which lets the user change the ID of the sender at compose Page dynamically ,so then the mail is sent from that ID despite being at other user's compose page</p>	<p><b><i>No such feature available as yet.</i></b></p>	<p><b><i>No such feature available as yet.</i></b></p>	<p><b><i>No such feature available as yet.</i></b></p>		
10.	Secure Folder	<p><b><i>Present.</i></b></p> <p>A folder that is protected by additional password and is used to store sensitive correspondence.The user can store his confidential mails in this folder and this folder is accessed by a secure password</p>	<p>No such feature Present</p>	<p>No such feature Present</p>	<p>No such feature Present</p>		
11.	SMS as a	<b><i>Present</i></b> with full	<b><i>Present but</i></b>	<b><i>Present but</i></b>	<b><i>Present but</i></b>		

	Flash	SMS compose feature, that is the entire SMS can be sent as a matter along with a unique feature of sending it as a Flash message meaning it won't be stored in user's mobile's inbox and will be deleted as soon as the user reads that message.	<i>not with these features.</i>	<i>not with these features.</i>	<i>not with these features. As only SMS alerts Can be sent.</i>		
12	Filters along with setting of Rules.	<b>Present</b> along with the facility to set ' <b>Rules</b> ' which lets the user specify/set upto 20 rules or actions for re-directing mails to specified folders etc.	<b>Present</b> , but not with such facility	<b>Present</b> , but not with such facility	<b>Present</b> , but not with such facility		
13	Administrat or Control Panel for Corporates( <b>Special feature</b> )	<b>Present</b> with various options such as : <ul style="list-style-type: none"> <li>• User Creation</li> <li>• Message Alerts(Allowing Domain administrator to send message to all users)</li> <li>• Mail Logs(To show the details of incoming and outgoing mails/mail size and Total Average with mail details being shown year wise, month wise or day wise)</li> <li>• Mailing List</li> </ul>	<b>Not Present, Only premium Features available</b>	<b>Not Present, Only premium Features available</b>	<b>Present</b> <ul style="list-style-type: none"> <li>• User Creation</li> <li>• No Message Alerts</li> <li>• No Mail Logs</li> <li>• No Mailing List</li> <li>• No System</li> </ul>		<b>Local</b>

		<ul style="list-style-type: none"> <li>• System Log showing complete system Information such as : a) <i>Traffic Analysis</i> b) <i>Load Average</i> c) <i>CPU Load</i> d) <i>Disk Usage</i> e) <i>New TCP Connections</i> f) <i>RAM Usage</i></li> <li>• AntiVirus Mail Log maintaining information like(Virus name, Number of mails infected with virus etc.)</li> <li>• Backup/restore Used for taking Database backups</li> </ul>			<p>Log</p> <ul style="list-style-type: none"> <li>• Customised Mail Box Size</li> <li>• No Anti Virus Mail Log</li> </ul> <p>Backup present</p>		<p><b>Mailing Lists</b> which physically writes the message to disk before it announces success, so that mail doesn't get lost if the Power goes out</p>
14	Integration with other ERP	<i>This is a feature that is Upcoming and integration of this product with other ERP systems is proposed and intended.</i>	<b><i>No such feature available as yet</i></b>	<b><i>No such feature available as yet</i></b>	<b><i>No such feature available as yet</i></b>		
15	Unlimited folders and	<b><i>Present.</i></b> Unlimited folders can	<b><i>Folder creation</i></b>	<b><i>Folder creation</i></b>	<b><i>Available with option</i></b>		

	space Customization for each user	be created by the user and Space can be fully customized for the user.	<b>Subject to space constraints and space customization only available to an extent/limit at a premium</b>	<b>Subject to space constraints and space customization only available to an extent/limit at a premium</b>	<b>of Creating unlimited email-id's and space also can be customized accordingly But with some restrictions</b>		
16	Mails Per Page	<b>Present</b> This option lets the user set the number of mail entries from 10 to 50 in a single page, thereby enabling the user to have a choice in deciding the inbox page to load a little faster.	<b>Not Present</b>	<b>Not Present</b>			
17	Availability on standalone application/software	This Product is quite flexible as it can be installable as a standalone application/software by any client at his/her location without any kind of dependency whatsoever on the vendor of the product.	<b>No such Feature available as yet</b>	<b>No such Feature available as yet</b>	<b>Some options controlled By the vendor and is not fully vendor independent</b>		
18	Mail interaction	<b>Present</b> This is a good feature which helps the user to maintain a history of mails thereby keeping a record of all mails related to a particular	<b>Not Present</b>	<b>Not Present</b>	<b>Technical Support provided</b>		

		correspondence.					
19	IMAP/POP 3 Support	<b>Present</b> <i>Any web mail client can be configured</i>	<b>Present</b>	<b>Present</b>		IMAP support	IMAP and Pop3 support
